My Experience Using Reimage

Impressions

Your first impression of Reimage.

I'd never heard of Reimage but then a friend recommended it.

I saw an ad for Reimage and it looked like it would fix my PC problem.

Use

Suggested content: Who do you think Reimage is best suited for? Who would you recommend use Reimage? What do you think is the best situation to use Reimage?

I would recommend Reimage for users who aren't tech-savvy.

I would recommend Reimage for people who are getting DLL errors.

I would recommend Reimage for people who want to reformat their PC but don't have their Windows CD.

Your Reimage Experience

The Reimage Experience section is a description of when & why you used Reimage, including details & opinions about your experience using Reimage.

Suggested content: What problem were you looking to fix on your computer? Did Reimage fix the problem? What were your results?

I came across this program when I was searching in PC help forums about how to fix a certain blue screen problem. I was also sure I had some viruses, as my PC was very slow. The entire scan – diagnose – repair process took a little over 30 minutes to complete, which is very fast since it's written that it may take up to one hour. Reimage was incredibly easy to use. Just a few clicks and the whole process of repairing my PC was automatically done for me. Even my grandmother (who doesn't really use a computer) could do it.

I got an informative profile of my hardware and PC status. It did actually fix my PC by removing viruses and I haven't had that blue screen problem again. The program interface isn't very pretty – no graphics or pretty animation, which is why the setup file is so small. Some people might actually care about this, but as long as it worked (it did!), this didn't bother me.

Reimage Software Performance

Suggested content: What was your impression during the time Reimage was scanning and repairing your PC? Was the analysis summary helpful to you? Did the Stability & Security threats listed give you a clue

as to what could be wrong with your PC? Did you understand what was going on during the scanning & repairing of your computer or did Reimage the process leave you confused?

Example:

I downloaded the program and did the free scan, which took maybe 5 minutes. After the 5 minute quick scan – I got my PC scan summary and everything looked pretty accurate to what I felt was wrong. In my case, Reimage found 5 malicious files on my PC, which I was prepared for. It also told me about one program that may crash. After the new replacement files were downloaded to my PC, the stability check took the longest to complete. Everything was easy to understand and the descriptions of what Reimage was doing to my computer were very clear.

Reimage Support (optional)

Suggested content: Did you have to contact support about anything? If so, did you have to do a Remote Session for them to fix your problem? Are you happy/unhappy about your experience with Reimage support?

Example:

I did have to contact Reimage support by email. They helped me with my problem and I was satisfied with the way my problem was handled and the overall experience of contacting Reimage support.

Personal Comments

Anything else you'd like to write or you could even include a screenshot of Reimage running on your PC.

Optional:

The Pros and Cons sections should be just a few solid points about Reimage.

Pros – the best couple points about Reimage

Example: Easy to use, useful scan report, unique program, does what it says it will

Cons –couple points about what could be improved

Example: The interface is ugly, takes forever, out of my price range
